The project developed a narrative for each scenario, reflective of key drivers of change. It also outlined plausible paths from the present to each of these 2042 futures (see NZ MoT (2014) for a detailed account of the scenarios and related paths). Alongside the narratives for these different worlds, a simple structural model was developed to estimate quantifications of levels of car travel in ...

The counterculture of the 1960s was an anti-establishment cultural phenomenon that developed throughout much of the Western world between the mid-1960s and the mid-1970s. The aggregate movement gained momentum as the Civil Rights Movement continued to grow, and would later become revolutionary with the expansion of the US government's extensive military intervention in Vietnam.
