Pozzolans are a broad class of siliceous or siliceous and aluminous materials which, in themselves, possess little or no cementitious value but which will, in finely divided form and in the presence of water, react chemically with calcium hydroxide at ordinary temperature to form compounds possessing cementitious properties. The quantification of the capacity of a pozzolan to react with ...

Limestone, mainly consisting of calcite, is a permitted additive to Portland cements often up to a 5 wt.% limit. It is shown by experiment and calculation that much, if not all, of this calcite is reactive and affects the distribution of lime, alumina and sulfate and thereby alters the mineralogy of hydrated cement pastes.

### **The role of calcium carbonate in cement hydration ...**

Portland cement was developed from natural cements made in Britain beginning in the middle of the 18th century. Its name is derived from its similarity to Portland stone, a type of building stone quarried on the Isle of Portland in Dorset, England.. The development of modern Portland cement (sometimes called ordinary or normal Portland cement) began in 1756, when John Smeaton experimented with ...

The ironic world of EM bond indices Weekly investor research . 23 April 2019. It is no small irony that the two main providers of benchmark indices for developed economies either already include or may be about to include Chinese government bonds, while the main provider of index services in Emerging Markets still does not deem Chinese bonds adequately tradable for index inclusion.

At the League's Annual Presentation Dinner in May, Jonathan Gage was named as the Assistant Referee of the Year for the 2015-16 season. Unfortunately Jonathan was unable to attend and collect his trophy on the night, so League Secretary, Gavin Hoare, caught up with Jonathan before his latest appointment on Saturday to present him with the shield and personal memento to record

this achievement.
