Direct Light - Lighting in which the light goes straight from the source to the lit object. An example is a light bulb or the sun. Compare that to indirect lighting, which is when there is no single direct light source. The object is lit by scattered or bounce light. For example on a cloudy day when the sun is covered by clouds, its rays are scattered and everything is lit indirectly.

"My story is not about my past, but about your future," says Marie Roberts Monville. In the startling tragedy of the Amish schoolhouse shooting at Nickel Mines, one story has never been told; Marie Roberts Monville, the wife of the man who created such horror, tells her story for the very first time.

### **One Light Still Shines: My Life Beyond the Shadow of the ...**

Earth's shadow or Earth shadow is the shadow that Earth itself casts onto its atmosphere and into outer space, toward the antisolar point. During twilight (both early dusk and late dawn), the shadow's visible fringe (sometimes called the dark segment or twilight wedge) appears in a clear sky as a dark and diffused band low above the horizon
