iPad Apps and Games - Mathsframe

Quadratics are algebraic expressions of the form. $ax^2 + bx + c$. Where a, b, and c are all constants (numbers, basically). We are first going to look at factorising quadratics where the number before the x^2 term, a, is 1, and then later (just for the higher students) we will look at how to factorise quadratics where a is something other than 1.. The aim of factorising is to break something up ...
