*Argiope bruennichi* is commonly known as the wasp spider. In Australia, *Argiope keyserlingi* and *Argiope aetherea* are known as St Andrew's cross spiders, for their habit of resting in the web with paired legs outstretched in the shape of an X, the cross of St Andrew. The large white zigzag in the centre of its web is called the stabilimentum or web decoration.

### **Argiope (spider) - Wikipedia**

Spider definition is - any of an order (Araneae synonym Araneida) of arachnids having a short, usually unsegmented abdomen linked to the cephalothorax by the pedicel, chelicerae modified into poison fangs, and two or more pairs of spinnerets at the posterior end of the abdomen for spinning threads of silk for various uses (as in making cocoons for their eggs or webs to catch prey).

Biologists classify animals and plants according to characteristics that they have in common. Organisms that move from place to place of their own accord and that do not manufacture their food from raw materials in their environment are classified as animals. Organisms that cannot move from place to place of their own accord (but can be moved by forces of nature or by animals) and that can ...
