The emblem bird of the United States, majestic in its appearance. It is not always so majestic in habits: it often feeds on carrion, including dead fish washed up on shore, and it steals food from Ospreys and other smaller birds. At other times, however, it is a powerful predator. Seriously declining during much of the 20th century, the Bald Eagle has made a comeback in many areas since the 1970s.

At present, golden eagles are capable of dragging adult mountain goats off cliffs with a bone-crushing grip strength of 750 psi, more than a lion's bite force. However, a golden eagle would have no chance against the prehistoric man-eating eagle of New Zealand. Before human colonization by the Maori people, the island only had three species of bat to greet them as fellow mammals.
